

PRODUCT CATALOG

“We are here with all our strength to realize the dream of a “sustainable and smart **industry**” by presenting the future-oriented power of **warning lights** to the sector.”

Welcome Costumers

Our production story started in 2010 in Beyoğlu, Istanbul, after 12 years of market experience, in a small workshop, with the confidence we have in our country. Despite the difficult conditions of the period, we believed in Mucco's success. We proceeded patiently and developed on this road that we set out with limited means.

We continued to produce and add value for this country without losing our initial excitement. As the Mucco family, following the innovations and struggling with difficulties have been our top priority principles.

We continued to produce and add value for this country without losing our initial excitement. As the Mucco family, following the innovations and struggling with difficulties have been our top priority principles.

At the same time, we care about stability in adapting to the world's developments by preserving our traditional values. In this rapid globalization process, we continue to add value to our worldwide customers by getting in touch with them.

As MUCCO Signalteknik, our quality management policy's main principle is to develop applicable, sustainable economic methods. We provide our customers with our technical support pre-sale and after-sales to present our products to domestic & foreign markets. We adopt a quality policy to meet customer satisfaction without sacrificing quality, fulfill our after-sale service responsibility, comply with legal regulations and obligations, continuously develop and improve, and provide an efficient and reliable working environment.

TABLE OF CONTENTS

	10		28		40		66
<p>Stack Lights</p> <p>Multilayered visual and audible indicators of a machine's status.</p>		<p>Multicolor RGB Warning Lights</p> <p>Multicolor RGB Series is high-quality and energy-efficient indicators that provide several different color options with a mixing of primary colors Red, Green, and Blue.</p>		<p>Universal Signal Beacons</p> <p>Multifunction beacons offer the advantage that a single beacon can cover several functions.</p>		<p>Universal LED Horns</p> <p>Multi-sound with Multi-light LED Horns offers a perfect combination for the highest signaling and alerting.</p>	
	80		94		102		112
<p>Universal Beacon Horns</p> <p>Combined Visual-Audible signaling horns for more control and safety.</p>		<p>Electronic Sirens</p> <p>Acoustic signals warn, protect, and guide us in modern industrial society.</p>		<p>Obstruction Lights</p> <p>Obstruction lights are vital in making high-rise buildings, towers and wind turbines visible to passing aircraft.</p>		<p>Heavy Duty Warning Lights</p> <p>Heavy Duty Multi-Tone Sounders well-suited for use in public areas or harsh industrial environments.</p>	
	124		128		136		142
<p>Safety Lights</p> <p>Visual warning for more safety: promotes workplace safety by preventing dangerous pedestrian and vehicle collisions. Easily mounted to a forklift and cranes.</p>		<p>Machine Tool Lights</p> <p>Machine interior lighting, the places which need local accent lighting such as carved machine, sparks machine, laser machinery, ceramic machinery and automated.....</p>		<p>Motor Sirens</p> <p>Motor sirens designed to give an effective warning over wide areas. The powerful low-frequency sound is ideal for covering long distances and is instantly recognizable.</p>		<p>Spare Parts</p> <p>Lens, housing parts, led modules, mounting brackets and etc.</p>	

DOMESTIC GOODS CERTIFICATES;
MADE IN TURKEY

Is a Certificate given by chambers and exchanges connected to TOBB by taking into consideration of industrial registry report and capacity report, which is issued only to domestic manufacturers and show that the related products are made in Turkey.

ISO 9001 QUALITY MANAGEMENT

INTERNATIONAL ORGANIZATION FOR STANDARDIZATION: ISO certification confirms that a management system, manufacturing process, service or documentation procedure has all the requirements for standardization and quality assurance.

CE CERTIFICATE OF CONFORMITY
 (EUROPEAN CONFORMITY):
 The manufacturer drew up CE mark - declaration demonstrates the fulfillment of the EU requirements and within the security requirements.

E-MARK:
 EUROPEAN VEHICLE APPROVAL:
 This approval symbol documents that the minimum technical requirements for use on vehicles.

EAC CERTIFICATE OF CONFORMITY:

The European conformity symbol EAC is provided by the Russia, Belarus, Kazakhstan customs union. The EAC symbol indicates that the product has undergone compliance procedures and fulfills its technical requirements.

RoHS CERTIFICATE OF CONFORMITY:

RoHS stands for Restriction of Hazardous Substances originated in the European Union and restricted the use of specific hazardous materials found in electrical and electronic products.

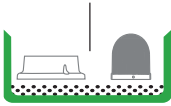

IP CERTIFICATE OF CONFORMITY:
 INGRESS PROTECTION
 As defined in International Standard IEC, Ingress Protection Rating classifies the degrees of protection of mechanical or electronic devices to water, dust, or external impacts.

Working Temperature In Highest And Lowest Rating.

LED Led Type.

Raw Material

Minimum and Maximum Volume Range.

Impact Resistance

Warranty Period Against Manufacturing Defects

WEEE: Electrical Waste
 Dispose In Accordance With Local Regulations.

- IP 0X :** No protection
- IP 1X :** Protection against a solid object greater than 50 mm such as a hand.
- IP 2X :** Protection against a solid object greater than 12,5mm such as a finger.
- IP 3X :** Protection against a solid object greater than 2,5mm such as a screwdriver.
- IP 4X :** Protection against a solid object greater than 1 mm such as a wire.
- IP 5X :** Dust protected. Limited ingress of dust permitted. Will not interfere with operation of the equipment.
- IP 6X :** Dust tight. No ingress of dust.

- IP X0 :** No protection
- IP X1 :** Protection against vertically falling water drops. Limited ingress permitted.
- IP X2 :** Protection against vertically falling water drops with enclosure tilted up to 15 degrees from the vertical. Limited ingress permitted.
- IP X3 :** Protection against water sprays up to 60 degrees to the vertical. Limited ingress permitted.
- IP X4 :** Protection against water splashed from all directions. Limited ingress permitted.
- IP X5 :** Protection against jets of water. Limited ingress permitted.
- IP X6 :** Protection against heavy seas. Powerful jets shall not enter the enclosure in harmful quantities.
- IP X7 :** Protection against the effects of immersion in water between 15 cm and 1 m for 30 minutes.
- IP X8 :** Protection against the effects of immersion in water under pressure for long periods.

Examples of noise in everyday life

Why Mucco?

Mucco Signaltechnik has managed to become one of the leading companies in the audio-visual warning lights sector since 2010. Providing customer-oriented solutions and reaching solutions by using the highest quality raw materials provides a great opportunity for customers. They can both find quick solutions to their problems and take advantage of the opportunities Mucco provides them with reasonable prices.

Mucco Signature uses SMD LED and POWER LED to keep the light quality at the highest level while producing warning lamps. Polycarbonate raw material is used in the production of lenses in order to bring the light transmission and diffusion to the highest quality level. In addition, ABS raw material is used in the bodies of the products to provide great resistance to impacts and vibrations.

In this way, it is possible to find the most economical and best quality warning lights products at Mucco Signaltechnik. Thank you for choosing us. As we always say “Our aim is to warning”

Our Vision and Mission

The 4th industrial revolution we know as Industry 4.0 is coming! The first industrial revolution was at the center of production using water and steam power. The second industrial revolution then initiated mass production with the help of electric power, followed by the digital revolution.

In the future, businesses will build automation-based networks that combine their machines, storage systems and production facilities. In this process, as Mucco Signaltechnik, we will produce the most suitable and most usable warning lights for engineers who control the process remotely in smart machines, storage systems and production facilities in this production environment.

In this sense, we are aware that we play a big role in Industry 4.0 as a warning lamp manufacturer and we make our future plans accordingly.

MUCCO
WORKING LAMP
MADE IN GERMANY

Stack Lights

RGB Warning Lights

Signal Beacons

LED Warning Horns

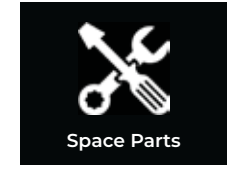

Beacon Horns

Electronic Sirens

- Stack lights are used in a variety of machines and process environments; specific color-coding is assigned by the system designer.
- Commonly used color codes for machine state conditions include:
 - RED: Failure conditions such as an emergency stop or machine fault
 - YELLOW: Warnings such as over-temperature or over-pressure conditions
 - GREEN: Normal machine or process operation
 - BLUE: External help request, where an operator might be requesting raw materials, scheduling or maintenance personnel assistance
 - WHITE: User-defined conditions to a specific machine, often related to productivity monitoring

STACK LIGHTS

Stack Lights ideally suited for status indication in industrial manufacturing and process control environments where a local visual and audible signal is required.

- Lens: Polycarbonate
- Lens Diameter: 70mm
- LED Module: SMD
- LED life duration: 50.000 hrs
- Light Colors: Red, Green, Yellow, Blue, White
- Light Modes: Steady, Flashing, Strobing, Rotary
- Sound: 2 melodies
- Volume: 103-116dB
- Sound and Light can be controlled separately
- Housing: ABS
- Mounting Types: Surface & Wall
- Does not affected by water, dust, heat and UV rays
- Warranty: 2 Years

Voltage Options:

7013: 12-24V AC/DC

7024: 24V/DC

7022: 40-260V AC/DC

7012: 220V/AC

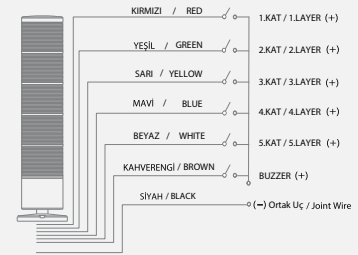

For more Details

Scan the QR Code for more information about the product

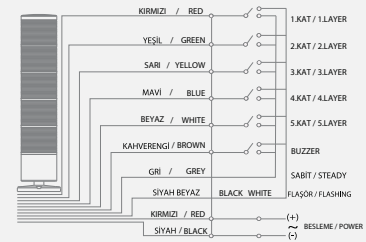

- Before making electrical connections to the products, please read the user manuals included in the box!
- Do not energize signal and contact cables other than the power cable (2x0.50mm).
- The product is out of warranty when the signal and contact cables are energized.
- The connection of the product should be made by at least electric technicians.

- Color order priority: Red- Green- Blue- Yellow
- RGB products are current protected.
- They can be connected directly o PLC.
In Series 220V
- Products supplied stably from the motherboard.
- Do not supply the signal and contact wires except power cable (2x0.50).
- The product is out of warranty if you supply signal and layer wires.

MULTICOLOR RGB WARNING LIGHTS

Multicolor RGB Series is high-quality and energy-efficient indicators that provide several different color options with a mixing of primary colors Red, Green, and Blue.

- Lens: Polycarbonate
- Lens Diameters: 70mm, 90mm and 100mm
- LED Module: SMD
- LED life duration: 50.000 hrs
- Light Colors: Red-Green-Yellow-Blue
 - 4 Different colors with RGB LED technology
- Light Modes: Steady, Flashing, Strobging
- Sound: 16 melodies
- Volume: 70-130dB
- Sound and Light can be controlled separately
- Housing: ABS
- Mounting Types: Surface & Wall
- Does not affected by water, dust, heat and UV rays
- Warranty: 2 Years

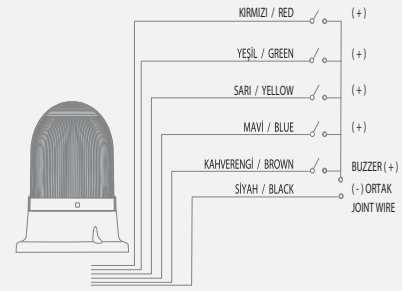

Voltage Options:

SNT-74: 12-24V AC/DC
SNT-72: 40-260V AC/DC

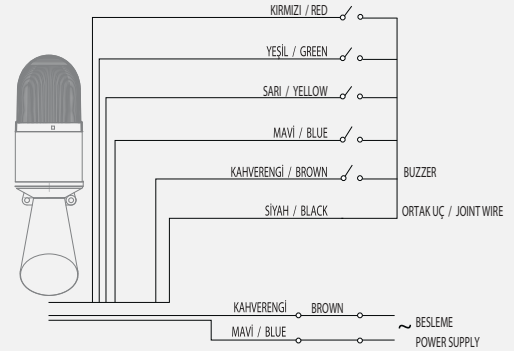

- Before making electrical connections to the products, please read the user manuals included in the box!
- Do not energize signal and contact cables other than the power cable (2x0.50mm).
- The product is out of warranty when the signal and contact cables are energized.
- The connection of the product should be made by at least electric technicians.

i Multifunction beacons offer the advantage that several functions can be covered by a single beacon. If conditions change, the function of the multifunction beacon can be changed quickly and easily and no new signal beacon needs to be purchased. Depending on the model, LED multifunction beacons can display up to 5 operating modes the following functions: Steady, Flashing, Strobe, Rotating light.

- The new series signal is available as a multifunction model in a POWER LED and an SMD LED version. Depending on the model, a different number of LEDs is installed inside. The high performance version is equipped with 5x3W Power LEDs, the other model in the with 45 SMD Leds. Both models can display 5 modes and up to 10tons.
- While the power led version provides light for much longer distances with its angular lightning feature, the SMD led version provides more diffuse light.

UNIVERSAL SIGNAL BEACONS

The largest and most extensive beacon series in 4 sizes ranging which can be combined with a buzzer indicator.

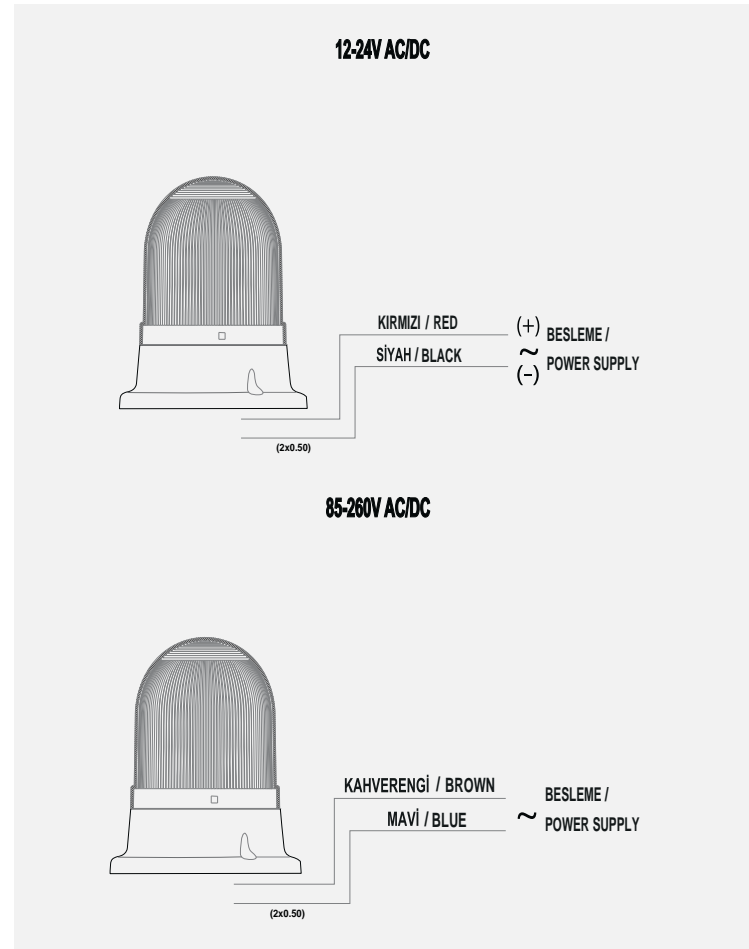

- Lens: Polycarbonate
- Lens Diameter: 70mm, 90mm, 100mm and 125mm
- LED Module: SMD / POWER
- LED life duration: 50.000 hrs
- Light Colors: Red, Green, Yellow, Blue, White
- Light Modes: Steady, Flashing, Strobing, Rotary
- Sound: 10 melodies
- Volume: 85-110dB
- Sound and Light can be controlled separately
- Housing: ABS
- Mounting Types: Surface & Wall
- Protection Cage against strokes
- Does not affected by water, dust, heat and UV rays
- Warranty: 2 Years

Voltage Options:

- Option 1: 12-24V AC/DC
- Option 2: 85-260V AC/DC
- Option 3: 220V/AC

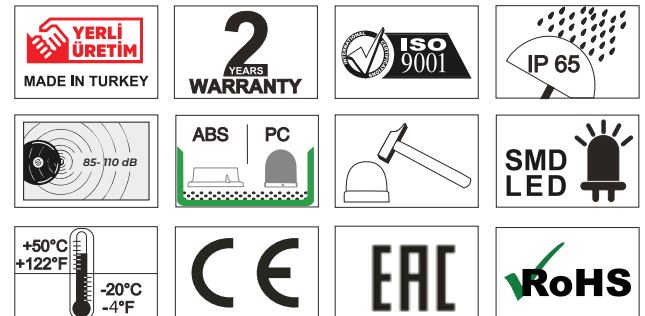

- Before making electrical connections to the products, please read the user manuals included in the box!
- The connection of the product should be made by at least electric technicians.

90 Universal Signal Beacon

Voltage Options:

SNT-915-... : 12-24V AC/DC

SNT-925-... : 85-260V AC/DC

Led Module Options:

SNT-910 / SNT-920 : 45 SMD LED

SNT-915 / SNT-925 : 5X3W POWER LED

- LED Module: SMD / POWER
- Light Colors: Red, Green, Yellow, Blue, White
- Light Modes: Steady, Flashing, Strobe, Rotary
- Sound: 10 melodies
- Sound&Light changing button
- Volume: 85-110dB
- Mounting Types: Surface & Wall
- Protection Cage against strokes
- Lens Diameter: 90mm

Maxi-Volt Signal Beacon

24-260 V

Maxi Volt Signal Beacons, which offer a wide range of voltage options, are specially produced for forklifts.

- Lens: Polycarbonate
- Lens Diameter: 90mm, 100mm and 125mm
- LED Module: 5x3W POWER
- LED life duration: 50.000 hrs
- Light Colors: Red, Green, Yellow, Blue, White
- Light Modes: Strobing
- Sound: 1 melody
- Volume: 117dB
- Sound and Light can be controlled separately
- Housing: ABS
- Mounting Types: Surface & Wall
- Protection Cage against strokes
- Does not affected by water, dust, heat and UV rays
- Warranty: 2 Years

Voltage Options:

Option 1 (without Buzzer): 24-230V AC/DC

Option 2 (with Buzzer) : 24-90V/DC , 24-60V/AC

Telephone Ring Signal Beacon

Telephone Ring Multifunction Indicators:

Telephone-connected signal beacons are easily integrated into internal lines in noisy working environments, allowing calls to be noticed.

Specifications:

- Lens: Polycarbonate
- Lens Diameter: 90mm & 100mm
- LED Module: 5x3W POWER
- LED life duration: 50.000 hrs
- Light Colors: Red, Green, Yellow, Blue, White
- Light Modes: Steady, Flashing, Strobging, Rotary
- Sound: 10 melodies
- Volume: 85-110dB
- Sound and Light can be controlled separately
- Housing: ABS
- Mounting Types: Surface & Wall
- Protection Cage against strokes
- Does not affected by water, dust, heat and UV rays
- Warranty: 2 Years

Voltage Options:

- Option 1 : 12-24V AC/DC

- Combination of an audible and visual Led Horns are among the products that stand out with their loud sound among warning lamps. It is among the products recommended for use in areas such as cranes, mines, ports, ships, weaving machines, etc.
- You can use led horns for audible and visual warnings in various industries such as mechanical engineering, production automation, automotive factories, warehouses, panels, and electronic control panels.
- Depending on the characteristics of the various models of Mucco Led Horns comes with 2,7 and 16 different tones of options up to 130dB.

UNIVERSAL LED HORNS

Multi-sound with Multi-light LED Horns offers a perfect combination for the highest signaling and alerting.

- Lens: Polycarbonate
- Lens Diameter: 70mm
- LED Module: SMD
- LED life duration: 50.000 hrs
- Light Colors: Red, Green, Yellow, Blue, White
- Light Modes: Steady, Flashing, Strobing, Rotary
- Sound: 16 melodies
- Volume: 124-130dB
- Sound and Light can be controlled separately
- Housing: ABS
- Mounting Types: Wall
- Does not affected by water, dust, heat and UV rays
- Warranty: 2 Years

Voltage Options:

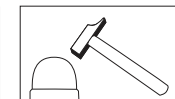

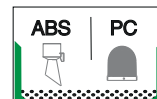

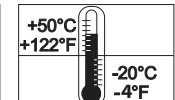

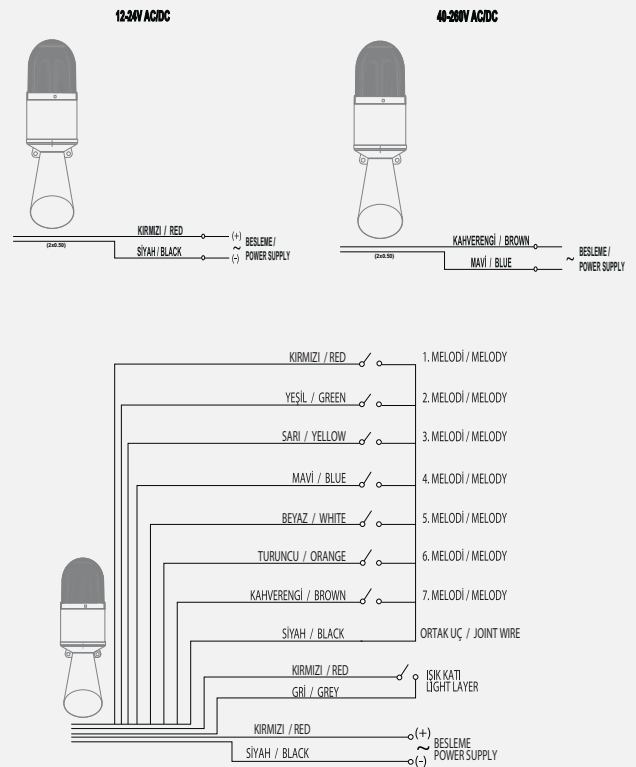

- Option 1: 12-24V AC/DC
- Option 2: 40-260V AC/DC
- Option 3: 24V AC/DC
- Option 4: 220V/AC

LED Warning Horns

Beacon Horns

Electronic Sirens

- Combination of an audible and visual Beacon Horns are among the products that stand out with their loud sound among warning lamps. It is among the products recommended for use in areas such as cranes, mines, ports, ships, weaving machines, etc.
- You can use beacon horns for audible and visual warnings in various industries such as mechanical engineering, production automation, automotive factories, warehouses, panels, and electronic control panels.
- Depending on the characteristics of the various models of Mucco Beacon Horns comes with 2,7 and 16 different tones of options up to 130dB.

UNIVERSAL BEACON HORNS

Multi-sound with Multi-light BEACON Horns offers a perfect combination for the highest signaling and alerting.

- Lens: Polycarbonate

- Mucco Low-intensity B type obstruction lights are manufactured according to ICAO (ANNEX 14) standards. All lighting systems have an IP65 protection class and are guaranteed for 2 years.
- By perceiving the level of light becomes active in the dark, becomes inactive in the daylight.
- It does not take account of the temporary loss of light throughout 30 sec. and it abolishes the light illusion.
- It gives a normally open, normally closed relay output over 30% in light loss and power failure.
- It has a 360-degree view range from 10 km.

OBSTRUCTION LIGHTS

Obstruction lights are vital in making high-rise buildings, towers and wind turbines visible to passing aircraft.

- Lens: Polycarbonate
- Lens Diameter: 100mm, 125mm
- LED Module: SMD
- LED life duration: 50.000 hrs
- Light Colors: Red, Green, Yellow
- Light Modes: Steady, Flashing
- Housing: ABS, Metal
- Mounting Types: Surface & Wall
- Does not affected by water, dust, heat and UV rays
- Warranty: 2 Years

- Compliant with Annex 14 ICAO standards.
- Activates in the dark and deactivated in the light by detecting the light level.
- It ignores the temporary light source for 30sec and eliminates the light illusion.
- Normally open, normally closed relay output in a condition of over %30 light loss and power cut.
- Visibility distance: 10km
- Visibility degree: 360
- Wireless option with solar energy.

Voltage Options:

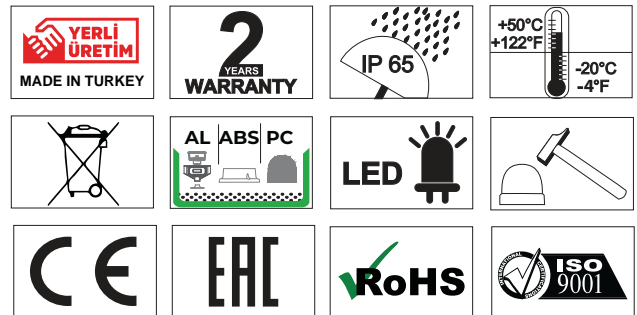

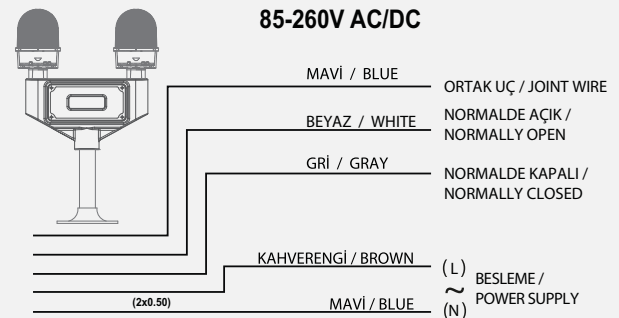

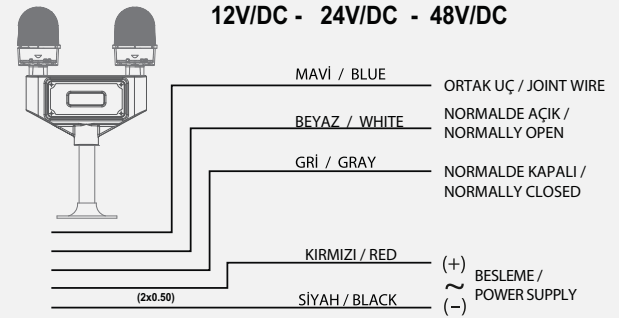

- Option 1: 12V/DC
- Option 2: 24V/DC
- Option 3: 48V/DC
- Option 4: 85-260V/AC

Machine interior lighting, the places which need local accent lighting such as carved machine, sparks machine, CNC machine, workbench lighting , laser machinery, ceramic machinery and equipment, medical equipment, automated.....

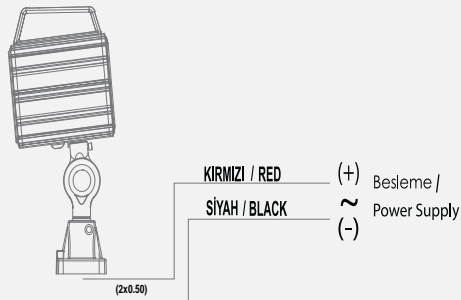

- Lens: Tempered Glass
- LED Module: Power LED
- LED life duration: 100.000 hrs
- Specifications: 10W-710LM-6000K-1300Lux
- Light Colors: White
- Housing: Aluminum
- Mounting Types: Machinery
- Does not affected by water, dust, heat and UV rays
- Warranty: 2 Years

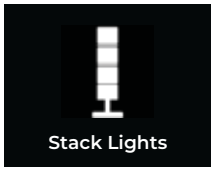

Voltage Options:

Option 1: 24V AC/DC

SL122 Series Motor Sirens

PART NO	SNT-SL122
Power Supply	220V/AC
Power Output	250W
Current	1,25A
Cycle	16000RPM
Housing	Metal
Volume	105dB
Prot.rate	IP40
Frequency	50Hz

Max. Duration of Use: 3min

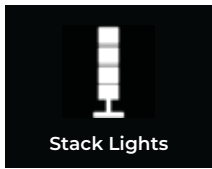

SL222 Series Motor Sirens

PART NO	SNT-SL222
Power Supply	220V/AC
Power Output	300W
Current	1,50A
Cycle	12000RPM
Housing	Metal
Volume	110dB
Prot.rate	IP40
Frequency	50Hz
